Wontok Expands into Latin American Markets with New Cybersecurity Partnership

ZMA IT Solutions becomes reseller for Wontok SafeCentral online session security endpoint solutions

Sydney, Australia and Palm Beach Gardens, Florida -December 15, 2014 Wontok, an innovator of malware prevention solutions for endpoints, cloud and network providers announced today that expansion into the Latin American marketplace will begin with Argentina. Wontok selected ZMA IT Solutions as its first reseller of flagship Wontok SafeCentral solutions in the region. Wontok selected ZMA IT Solutions for its long experience and trusted reputation for over 50 years as an established leader in professional services for information security management software specializing in infrastructure and applications, mobile and cloud computing.

ZMA IT Solutions offers Wontok SafeCentral for mobile and desktop protection for online home banking, eCommerce or other credit card sessions. Additionally, ZMA will market Wontok SafeCentral for business' to help prevent malware from gaining access to networks' sensitive data through remote worker, contractor or third-party vendor endpoints such as laptops or mobile devices.
Latin America has been experiencing tremendous growth in cybercriminal activity generating cyberattacks over the past three years including web-based attacks against financial and industrial sectors as well as attacks on Android devices via SMS Trojans.

Wontok's secure by design philosophy and engineering methodologies look at security from the ground up by assuming malware is already present on the desktop, mobile device, or even a terminal like POS or ATM. Unlike traditional antivirus or firewalls which advanced malware can easily bypass, Wontok SafeCentral prevents malware from reaching its target. By working at the deepest defense layer for interception, monitoring and protection where malware resides, Wontok SafeCentral keeps sensitive data and transactions safe.

Wontok CEO, Adam Tegg states: "We are pleased to be able to work with an experienced partner such as ZMA IT Solutions with strong information security systems expertise so that together we may address the growing cybercriminal threat in South America."

Marianela Zampatti, Executive Partner, ZMA IT Solutions, adds: "The increasing number of online frauds in Latin America makes online protection against cyberattacks a must. ZMA is committed to offering our customers the best technology available. After intensive laboratory tests Wontok SafeCentral proved to be the only online session security solution to keep online financial transactions safe. We are delighted to add Wontok SafeCentral to our portfolio."

About ZMA
